PLAYING THE GAME

THE POPIT MENU

Press the ○ button and the Popit Menu will literally "pop" into the air above Sackboy's head. The Popit Menu is an ingenious tool that's capable of amazing things: it contains all of the creative options at Sackboy's disposal. Almost every icon in the Popit Menu offers multiple menu pages: just press the L1 button or the R1 button to switch between them.

TIPS FOR CONTROLLING YOUR SACKBOY

Either move the left stick ↑ to move into the background or ↓ to move into the foreground. Tilt the Wireless Controller and Sackboy will shake his head; press the L3 button and tilt the Wireless Controller at the same time and Sackboy will wiggle his hips.

Press the directional buttons and Sackboy will change his expression: press ↑ for happy, ↓ for sad, ← for worried and → for annoyed. Continue pressing a directional button to intensify the expression. Sackboy also likes to wave his arms around: press and hold the L2 button and use the left stick to control his left arm or press and hold the R2 button and use the right stick to control his right arm.

WHAT IF SACKBOY GETS TRAPPED?

Don't get too upset! Open the Popit Menu, select the icon, then press and hold the ⊗ button for a few seconds. Your Sackboy will vanish into thin air and reappear at the last activated checkpoint.

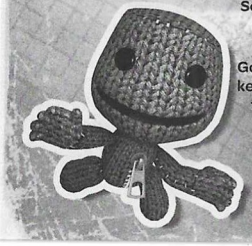
USING STICKERS AND DECORATIONS

There are many stickers and decorations to collect on your journey through LittleBigPlanet™ 2. Open the Popit Menu and select Stickers & Decorations to look at all of your available goodies. Press the ⊗ button to select an item and use the left stick to move it around the environment, then press the ⊗ button to stamp it into place.

If a PlayStation®Eye camera is connected to the PS3™ system, you can create some personalised stickers. Point the camera at the desired subject, open the Popit Menu, choose Stickers & Decorations and select the PlayStation®Eye Camera option. Any photos you've received from friends online or collected from Community levels can be accessed via the Community Photos option.

LET'S GET CREATIVE

Select "Me" from your Pod and get your creativity flowing with the following options...



MY EARTH

Got some favourite levels and creations that you've uploaded online? You can also keep them safe and sound in My Earth, your very own planet that's big enough to store up to 20 of your chosen levels.

MY PROFILE

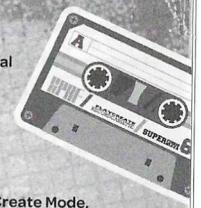
Display info about yourself, view your recent activity, read comments from other creators or rate any cool levels you've played online.

DECORATE

Snazz up your My Earth area and customise it to your taste with any decorations and materials in your collection.

MY MOON

Within My Moon, select Create to start building a new level from scratch. Here are a few handy hints to keep in mind:



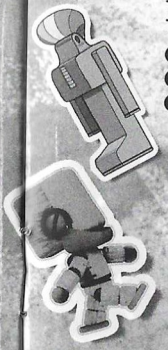
- There's a nifty Hover Mode available for areas that are hard to reach. Press the ↓ directional button to turn it on or off and use the left stick to fly Sackboy around.
- Use the right stick to zoom in and out to give yourself a better view of what you're creating.
- The thermometer on the left-hand side of the screen indicates how full up your level is. You can't keep cramming stuff into it forever!
- To try out your creation, press the START button and select Change to Play Mode. To return to Create Mode, press the START button and select Change to Create Mode.

Feeling overwhelmed by it all? Don't fret! Handy tutorial videos are always on hand to help you get to grips with things in My Moon.

MATERIALS

Materials can be found within Prize Bubbles, which are liberally scattered throughout LittleBigPlanet™ 2. Once some Materials have been collected, new objects can be created in My Moon. Simply open the Popit Menu and select the Goodies Bag icon, choose the Materials Menu and make a selection.

SAVING AND PUBLISHING A LEVEL



To save a level you've created in My Moon, press the START button and choose Save or Save As. To share your new level online, follow these simple steps...

1. From the Pod, access My Moon and select a level to publish.
2. Press the ○ button and select Publish.
3. Add a small description of your level for the benefit of other online players. When you're finished, highlight "Done" and press the ⊗ button to share your creation.
